MUTHOJU PRAVALIKA

Hanamkonda, Telangana, India | +91 9063407481 | muthojupravalika99@gmail.com | LinkedIn | GitHub
Willing to relocate to Gurgaon (Work From Office)

PROFESSIONAL SUMMARY

Computer Science (AI & ML) undergraduate (CGPA 9.2/10, 2027 batch) seeking the Solution Engineer Associate role in Virtuos Digital Engineering's Springboard Program. Full-stack internship experience at APTRANSCO building back-end reporting modules and dashboards, with strong SQL, data modeling and REST API fundamentals. Salesforce AI Associate certified and quick to learn new platforms; eager to build integrations and connectors for CRM and enterprise applications.

TECHNICAL SKILLS

Programming: Python, Java, C, JavaScript, SQL
Frontend: HTML5, CSS3, JavaScript, React.js
Backend: Django, Node.js, Express.js, FastAPI, REST APIs
Core CS: Data Structures and Algorithms, OOP, DBMS, Operating Systems

- **Core Strengths:** Problem solving, logical reasoning, requirement analysis, debugging, teamwork, communication

WORK EXPERIENCE

Full Stack Developer Intern – APTRANSCO May 2026

- Developed back-end reporting modules and dashboards for operational teams to monitor energy consumption trends; selected through a competitive national-level process.
- Wrote SQL queries to validate, clean and analyse large-scale transmission datasets, improving reporting accuracy.
- Debugged data inconsistencies end to end and documented fixes in clear, stakeholder-ready reports.

AI Developer Intern – Swecha Telangana June 2025

- Processed and evaluated large text datasets in Python to improve AI response quality; contributed to testing pipelines via Git.

Research Intern – NIT Warangal June 2025

- Built Python optimization and evaluation scripts, benchmarking models against baselines and improving scheduling efficiency by 28–32%.

PROJECTS

Energy Consumption Analysis Dashboard 2025

- Built a Python and SQL data pipeline to clean, validate and query energy and transmission datasets.
- Delivered dashboard views that surface consumption trends for decision-makers.

AI-Powered Career Guidance System (Patent Published) 2024

- Built an NLP and ML recommendation engine served through an application back end; improved accuracy by 22% via feedback-based re-ranking.

Smart Grid Optimizer using Reinforcement Learning 2025

- Designed a Python load-balancing model tested across 500+ simulated scenarios; safety constraints cut instability by 20%.

EDUCATION

B.Tech in Computer Science and Engineering (AI & ML) 2023 – 2027
SR University, Warangal CGPA: 9.2/10 | No active backlogs

ACHIEVEMENTS & HACKATHONS

- 3rd Prize among 100+ teams at IEEE Hyderabad Project Expo.
- Top 5% at Smart India Hackathon (college level).
- Published a patent for an AI-Powered Career Guidance System using NLP.

CERTIFICATIONS & LEADERSHIP

Salesforce AI Associate | Microsoft Certified: Azure AI Fundamentals (AI-900) | Oracle Cloud Infrastructure Foundations Associate | NVIDIA Deep Learning Fundamentals

Public Relations Lead, GDG Sankhya | Mentored 80+ students in Python and delivered ML workshops to 100+ participants.
